

# PRE Curriculum

## Worksheet 7.3.5a

### “Specifications for the Creation Project” (Group Work)

For week 5, you will work in groups to **create a display on the subject of ‘creation’**.

Each group will focus on one of the following:

- (1) Hindu ideas
- (2) Christian stories
- (3) Scientific theories

The teacher will arrange your groups, hopefully so you can work on your favourite.

The display has to be ready by the end of the third lesson in Week 6. It should include writing and pictures (photos, drawings, etc.)

You will spend some time doing research. Below are ten questions. Answer as many as you can and then show your answers on your group’s display.

The ten questions are:

1. What is one story connected to creation?
2. How was the world created?
3. Who was involved in creation?
4. The world is made of elements; what are the most important ones?
5. How long does this universe last?
6. How will this world be destroyed? (And, what happens afterwards?)
7. How many species of life are there?
8. What creatures (if any) live in other planets?
9. Is there any idea of an eternal, spiritual world?
10. What is the purpose of creation?

Have fun!
